NOTICE AND DISCLAIMER

This NOTICE AND DISCLAIMER is made to all retail customers purchasing any River Pools® or Thursday Pools® pool shell or otherwise dealing with a River Pools or Thursday Pools dealer or franchisee.

Thursday Pools, LLC manufactures River Pools® and Thursday Pools® pool shells and sells those pool shells to locally owned and independently operated dealers. Those dealers resell and install those pool shells for their customers. Thursday Pools, LLC also manufactures River Pools pool shells and sells them to independently owned and operated franchisees who have franchise agreements with River Pools Franchising, LLC. River Pools Franchising, LLC provides those franchisees with the non-exclusive right to market the River Pools pool shells as a franchisee. River Pools Franchising, LLC does not manufacture pool shells, and neither Thursday Pools, LLC nor River Pools Franchising, LLC installs pool shells or guarantee the obligations of any dealers or franchisees. No dealer or franchisee is an owner, agent, or employee of Thursday Pools, LLC, and no dealer or franchisee is an agent of River Pools Franchising, LLC or has authority to act on behalf of Thursday Pools, LLC or River Pools Franchising, LLC. Thursday Pools, LLC and River Pools Franchising, LLC each disclaim any responsibility or liability for the actions or inactions of any dealer or franchisee. Any statement in any advertisement, literature, brochure, website, or statement by any dealer, franchisee, or other individual should not be interpreted or construed to expressly or impliedly create any relationships contrary to this Notice and Disclaimer.

POOL SAFETY

Pool owners should always think of SAFETY FIRST. They should take specific steps to ensure that their family members and guests are knowledgeable about the safe and sensible use of their pool. It's also a good idea for pool owners to contact their local American Red Cross for available CPR classes and other vital safety programs. Pool owners should ensure:

1. That their pool is never used unless there is adequate supervision.
2. That their pool is kept in good repair and is not used when there is a missing or broken drain cover or other component.
3. That ALL CHILDREN using their pool are under constant supervision.
4. That anyone under the influence of alcohol, drugs, or stimulants that would impair their abilities or judgment does not use the pool.
5. That their pool is protected by appropriate barriers to prevent unsupervised entry, including, but not limited to, fencing with self-latching gates, automatic pool covers, alarms, etc., as required by local laws and safety standards.
6. That their pool builder has supplied them with all of the safety information that accompanies the pool and that they have installed the provided warning stickers and signs where they can be clearly visible to all who use the pool.
7. That for increased child safety, they always remove all toys from in and around the pool and store them out of sight when the pool is not in use.
8. That no pool users dive or jump in the pool.
9. That additional important safety information accompanying their pool is reviewed carefully before use.

Please note: Items that are essential for the safe use of your pool may not be visible in many of the photographs contained in this brochure, either because of perspective or camera angle, or because they were removed for photographic purposes. These items include, but are not limited to:

1. Safety ropes, which should remain in place at all times.
2. "No Diving" signs, which are provided and should be installed where they are clearly visible in accordance with instructions included in the Owner's Manual.
3. Necessary means of exit and entry into the pool.
4. Approved drain covers and other devices to protect against suction entrapment.
5. Minimum required inlets and returns to ensure proper water circulation.
6. Appropriate in-pool lighting if the pool will be used after dark.

All of these devices should be installed in accordance with manufacturers' instructions, the National Pool and Hot Tub Alliance standards, as well as state and local statutes and codes.

If the pool is labeled by River Pools as NON-DIVING, then diving equipment may not be installed, and any such equipment must be removed before the pool is used.

River Pools strongly recommends that diving boards and slides not be installed or used with its pools, given the inherent dangers associated with diving boards and slides in residential pools. These dangers include brain, spinal cord, and other severe permanent injuries, and death. For that reason, River Pools does not manufacture or sell diving boards or slides. If, despite this warning and recommendation, the owner decides to install or use a diving board or slide, the owner assumes all risks inherent with a diving board or slide, and River Pools further warns that diving boards and slides require minimum depths and distances and must be installed and used in strict compliance with the equipment manufacturer's specifications and ANSI/NSPI, ANSI/APSP, and ANSI/APSP/ICC standards, as well as in compliance with all applicable laws, rules and regulations. The owner is responsible for making sure the pool is appropriate for diving boards and slides and otherwise meets all standards and laws for diving pools, and the owner must consult the diving board or slide manufacturer and/or installer as to the appropriateness of the pool for the diving board or slide and that its installation, location, and use meet all standards and laws for diving and slide pools. Handrails, ropes with floats, and safety equipment may have been removed for photography purposes. River Pools recommends that all pool installations install a handrail and comply with all federal, state, and local building codes.

ADVANCED FIBERGLASS POOLS

MANUFACTURING

A POOL ISN'T JUST A POOL.

It's where memories are made—where your family connects, laughs, and soaks up summer after summer together. That's why we build our pools to last, using the highest standards from the ground up.

It all starts with the mold. Our manufacturing campus is purpose-built to protect it. Molds are stored indoors, moved only on flat surfaces, and handled with care to preserve their integrity. Each pool is crafted, cured, trimmed, and prepped entirely indoors—ensuring a finish that's smooth, strong, and stunning inside and out.

LET'S LOOK AT THE MATERIALS THAT BRING IT ALL TOGETHER:

GELCOAT

The surface of a River Pools fiberglass pool is smooth, glossy, and built to endure. Our gelcoat is among the most trusted and tested in the industry—resistant to algae, UV rays, and even pet claws.

VINYL ESTER RESIN BARRIER

A layer of vinyl ester resin is applied directly behind the gelcoat. This essential barrier protects against osmotic blistering and helps maintain the long-term beauty of the pool.

CHOPPED FIBERGLASS

We apply chopped fiberglass with precision equipment to maximize bond strength and achieve consistent coverage in key structural layers.

HAND-LAID ROVING

We apply hand-laid roving fiberglass—thick, woven strands layered by skilled craftsmen to add strength and durability exactly where it's needed most.

STITCH MAT ROVING

Stitch mat roving adds a multidirectional layer of strength. Its unique construction helps prevent cracks and distributes loads evenly in areas of high stress.

HONEYCOMB CORE

Steps, benches, and tanning ledges are reinforced with a honeycomb core structure—providing superior support for every surface above the floor. We also integrate vertical supports throughout the walls for added rigidity.

At River Pools, we believe the best pool experience comes from details that serve both homeowners and dealers. That's why we offer three innovations designed to make fiberglass pools stronger, sleeker, and simpler to install and enjoy.

THE LUCKY 7® SKIMMER

The Lucky 7® Skimmer is designed with the same attention to detail that makes every River Pools pool stand out. Standard skimmers often create challenges for installers and interrupt the clean lines of a pool's design. The Lucky 7 solves both. Its angled, 7-degree throat is made specifically for fiberglass, making installation easier, faster, and more reliable. At the same time, the skimmer's sleek profile blends naturally with the pool wall, helping maintain water level and visual harmony. The result? Installers save time while homeowners enjoy a smoother, more polished look that lasts for years. Small innovations like the Lucky 7 Skimmer make a big impact—ensuring every River Pools pool that has one looks beautiful, functions flawlessly, and delivers the quality families deserve.

THE DOUBLE-07® SKIMMER

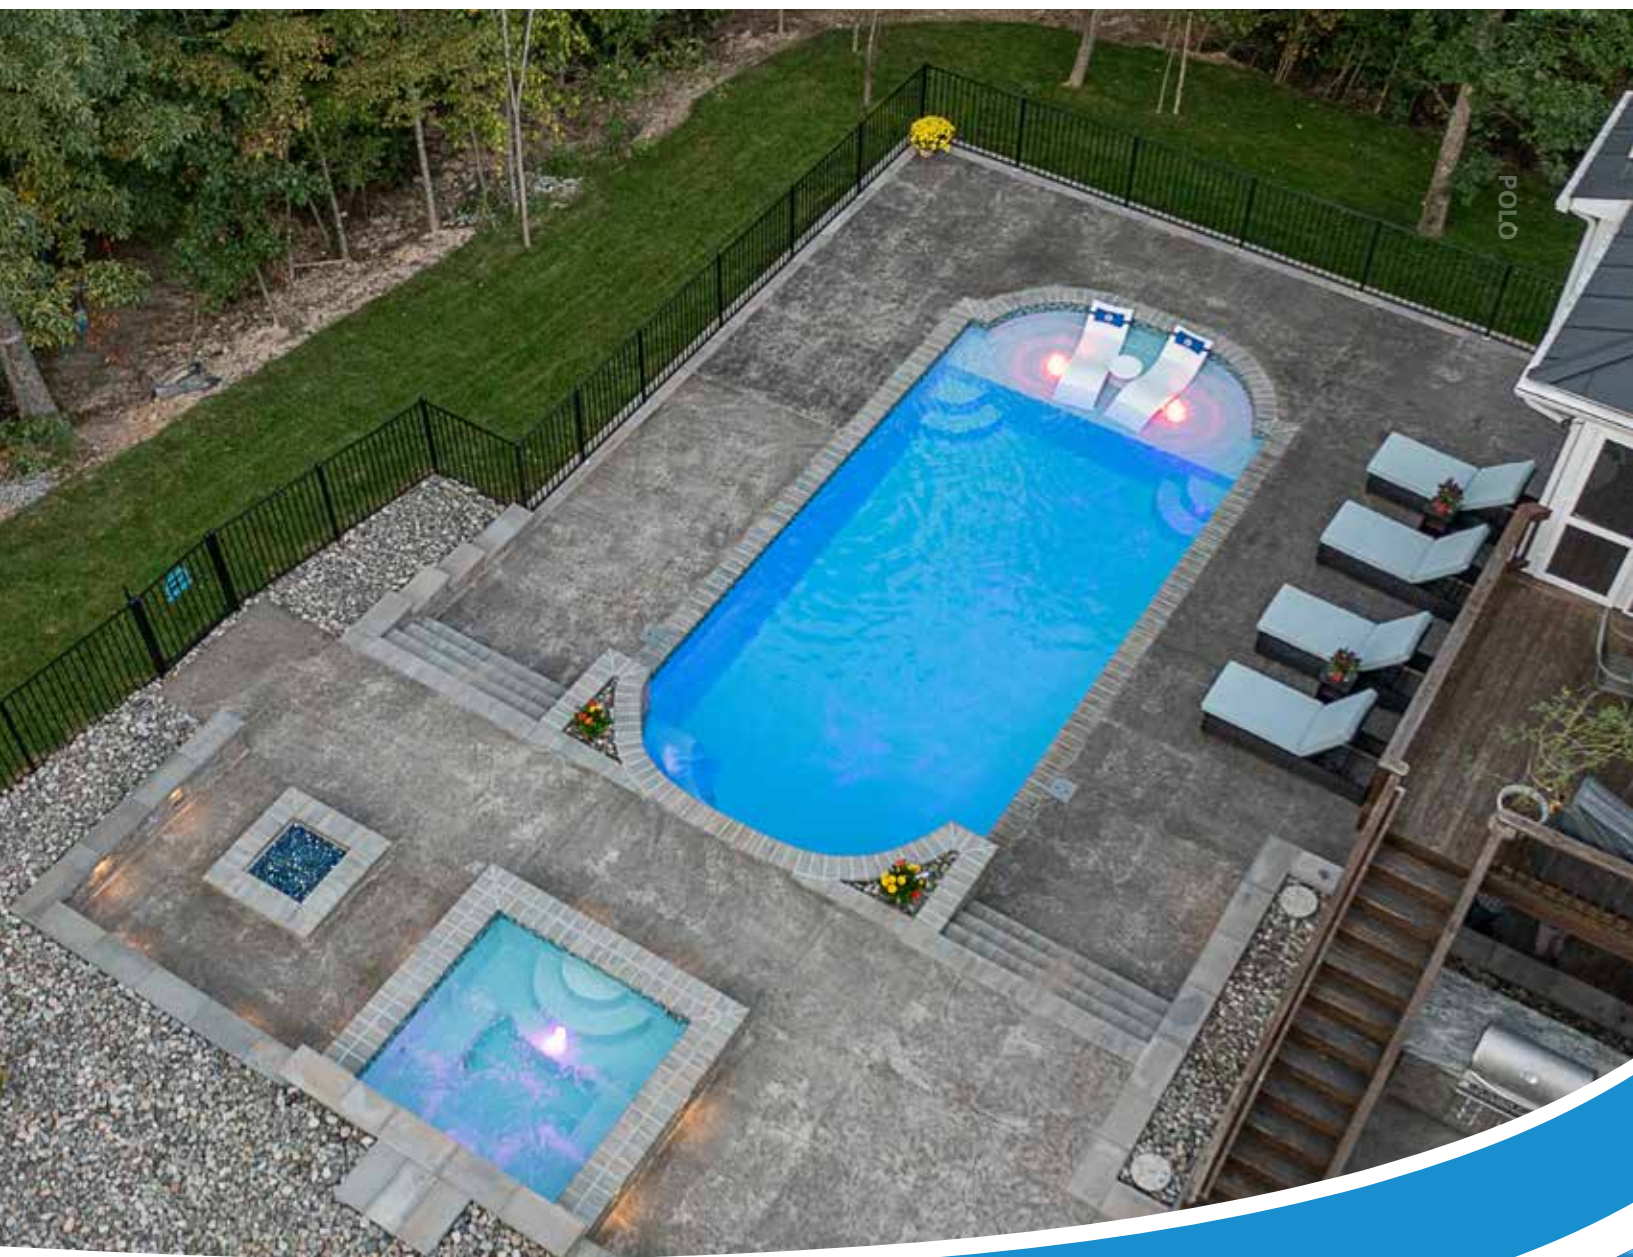

The Double-07® Skimmer brings the same thoughtful balance of form and function. Traditional skimmers can be tricky to install and disruptive to a pool's overall look. The Double-07 Skimmer simplifies installation and offers a sleek appearance. Its rounded faceplate blends seamlessly with features like lights and bubblers, while the fiberglass-friendly 7-degree angle makes installation more straightforward. The result? Installers get an easier, more reliable fit, and homeowners get a cleaner, more polished design that helps maintain optimal water levels.

THE Z LEDGE®

The Z Ledge® takes today's most popular feature—the tanning ledge—and makes it better for everyone. For homeowners, it means peace of mind knowing your tanning ledge is solid underfoot and ready for lounging, tanning, or keeping an eye on the kids. For dealers and installers, it eliminates some challenges with leveling and the old headache of pouring concrete. With the Z Ledge, a one-step process ensures a faster, cleaner installation and consistent quality every time.

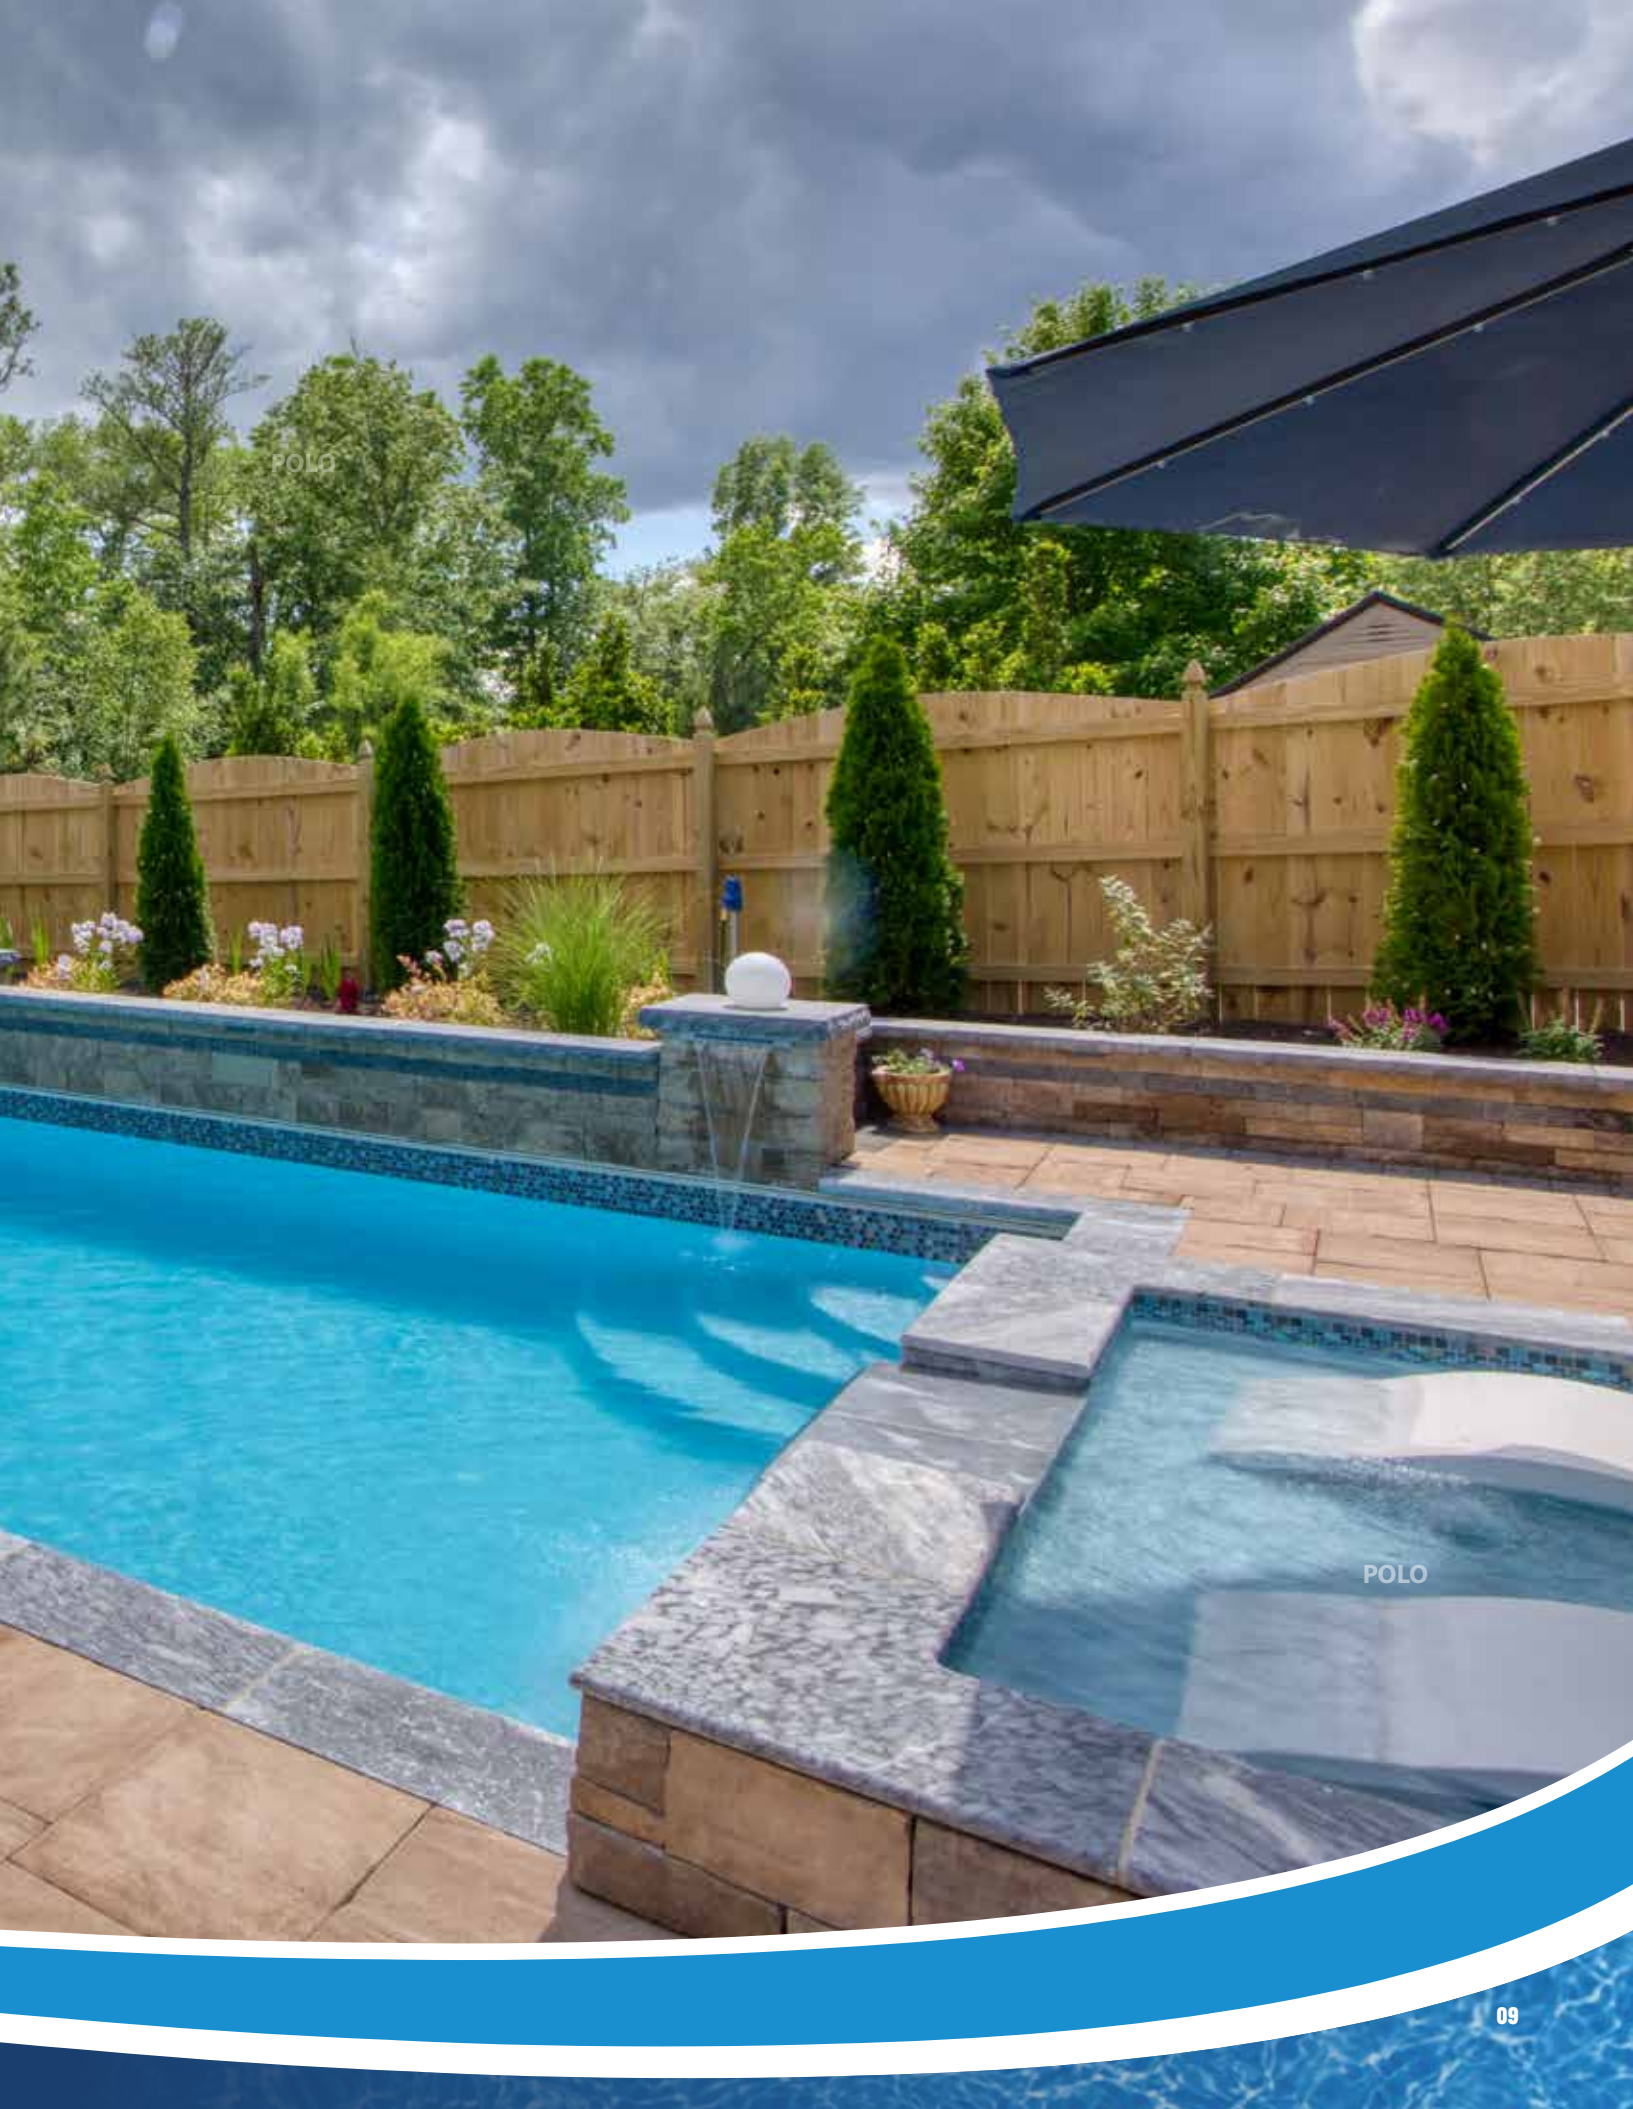

The pool industry is always changing, and we aim to be ahead of the curve. Whether we are the inventors or not, we are always searching for solutions to problems that have plagued homeowners and pool builders alike.

POLO

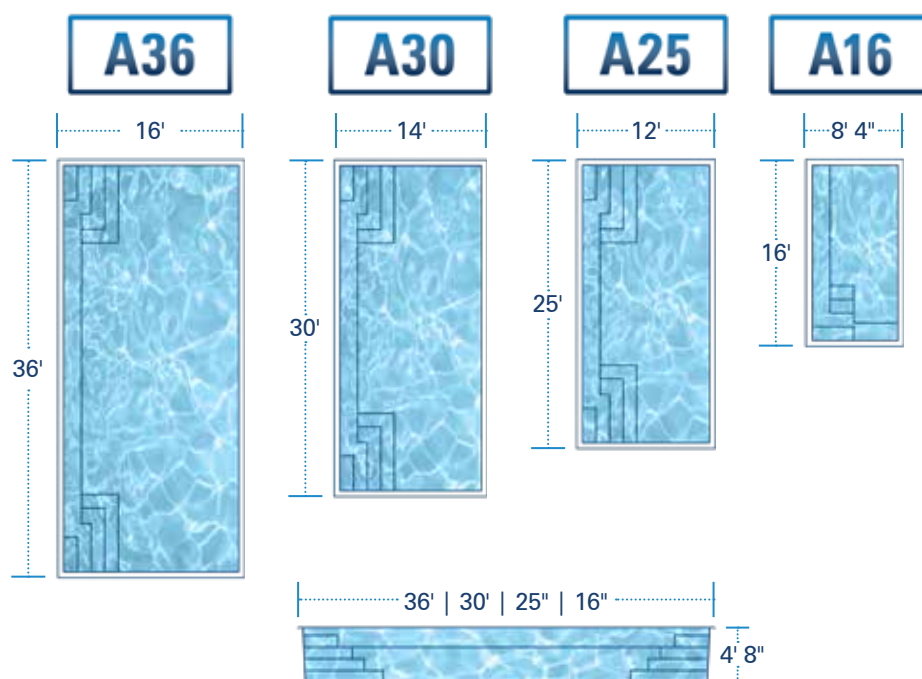

POLO

A SERIES

MARCO

The A Series fiberglass pools are designed for endless fun. These sleek, flat-bottom designs are perfect for social gatherings and relaxation. Automatic cover compatibility also gives peace of mind so you can focus on making memories that last a lifetime

THE A SERIES FEATURES:

DUAL EASY-ENTRY POOL STEPS

The cascading steps of the A Series are specially designed for easy entry and exit at both ends of the pool.

FULL-LENGTH BENCH

Want to take a break from the action and hang out with some friends? The full-length bench is designed to engage everyone in the crowd.

OPEN FLAT-BOTTOM INTERIOR

Looking for space to host a party, play, or swim laps? The open interior offers options throughout a hot summer day and into the evening.

AUTOMATIC-COVER FRIENDLY

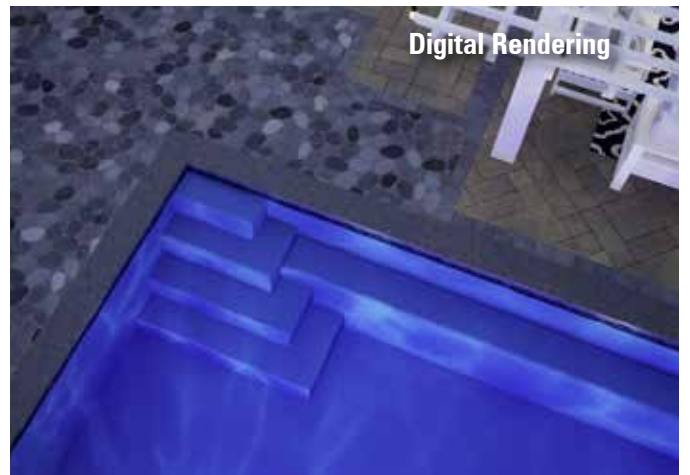

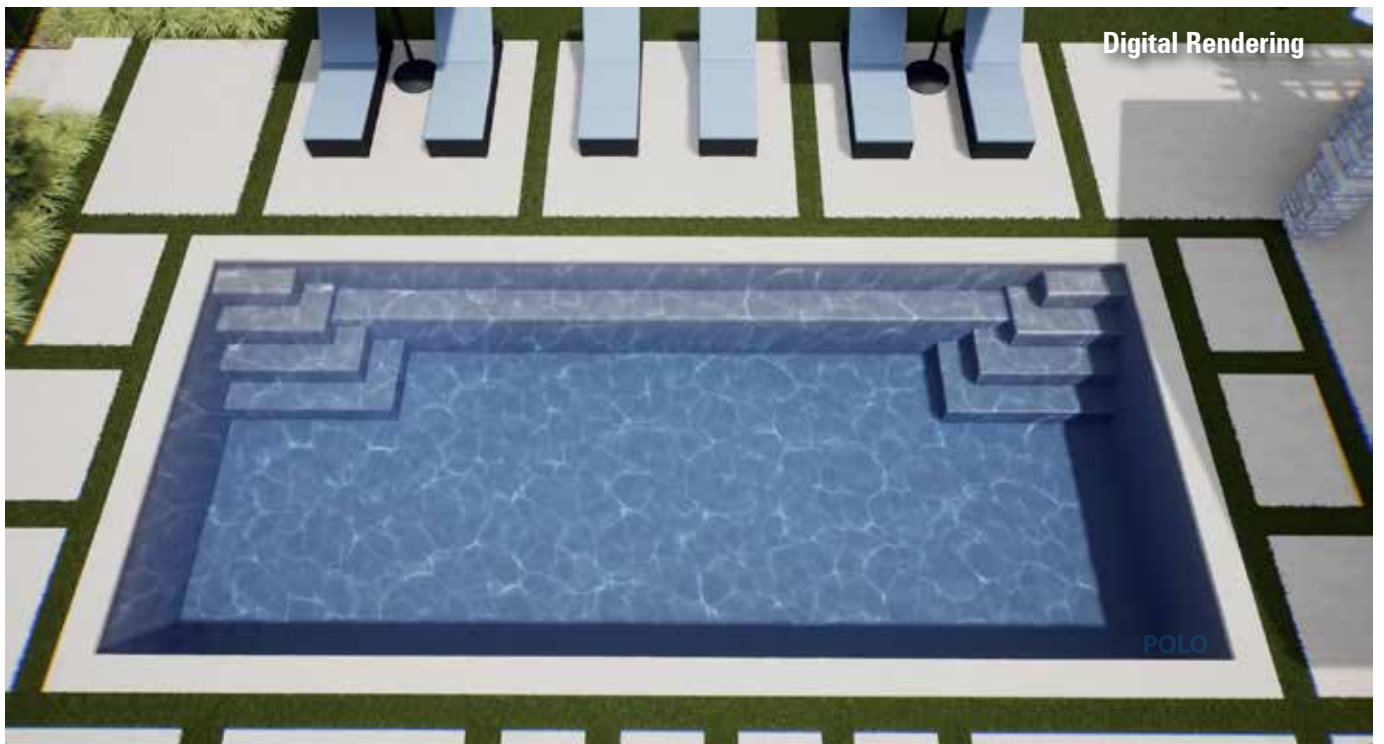

The rectangular design of the A Series allows cover tracks to be hidden beneath the pool coping, protecting them and keeping them out of sight.

TEXTURED POOL STEPS, TANNING LEDGE, & FLOOR

With your safety in mind, all A Series pools have hand-crafted, skid-resistant texture integrated into the surfaces of the bench, steps, and pool floor.

* Non-Diving Pool
* See Safety Information

All measurements given reflect the dimensions of the pool to the exterior of the pool structure, and not the dimensions of the pool interior.
1. All depths reflect the depth of the pool structure. Water depths may vary depending on the amount of water in the pool.
2. Additional specifications are available at riverpoolsandspas.com.

C SERIES

MARCO

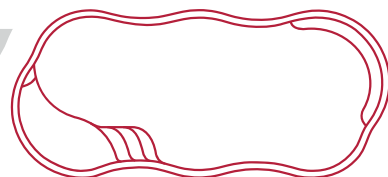

POLO

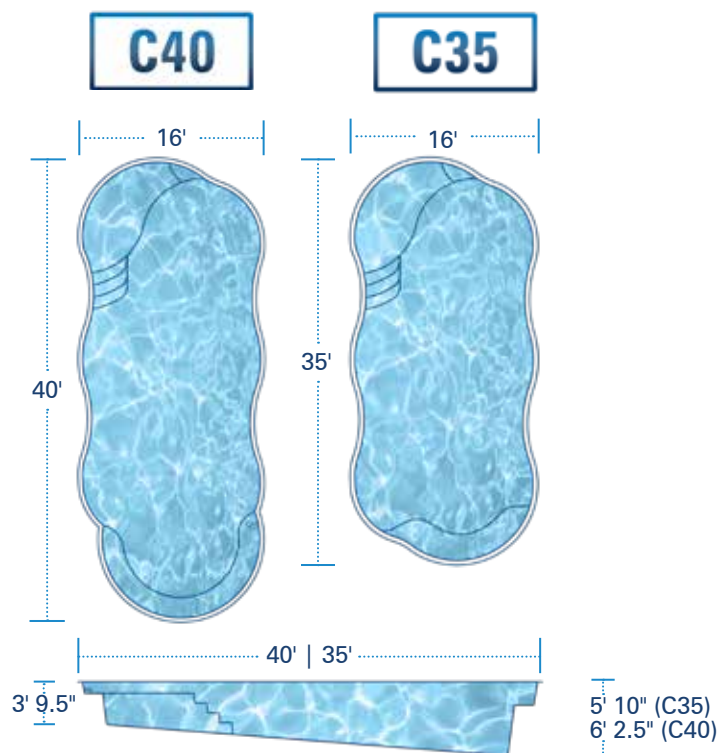

POLO

River Pools®
CATCH THE WAVE

C SERIES

Looking for a tanning ledge pool with the perfect blend of curb appeal and swim space? As one of the most popular freeform pools available, the C Series packs tons of fun features into a single elegant design.

THE C SERIES FEATURES:

SPACIOUS TANNING LEDGE

Designed to accommodate multiple lounge chairs, the tanning ledge on the C Series provides plenty of room to kick back and immerse yourself in a good book and catch some rays. Ask your installer about adding bubblers to up the fun factor.

EASY-ENTRY POOL STEPS

The cascading steps of the C Series are specially designed for easy entry and exit of the pool.

OPEN POOL INTERIOR

Swim and play away. The C Series is a spacious freeform fiberglass pool design with an open interior.

GENEROUS DEEP-END BENCH

Relax in style with this generous seating area and enjoy a great space for the entire family to relax together. Ask your installer about adding spa jets for the ultimate therapeutic experience.

TEXTURED POOL STEPS, TANNING LEDGE, AND FLOOR

With your safety in mind, all C Series pools have hand-crafted, skid-resistant texture integrated into the surfaces of the ledge, steps, and pool floor.

* Non-Diving Pool
* See Safety Information

All measurements given reflect the dimensions of the pool to the exterior of the pool structure, and not the dimensions of the pool interior.

T40 MODEL

MARCO

POLO

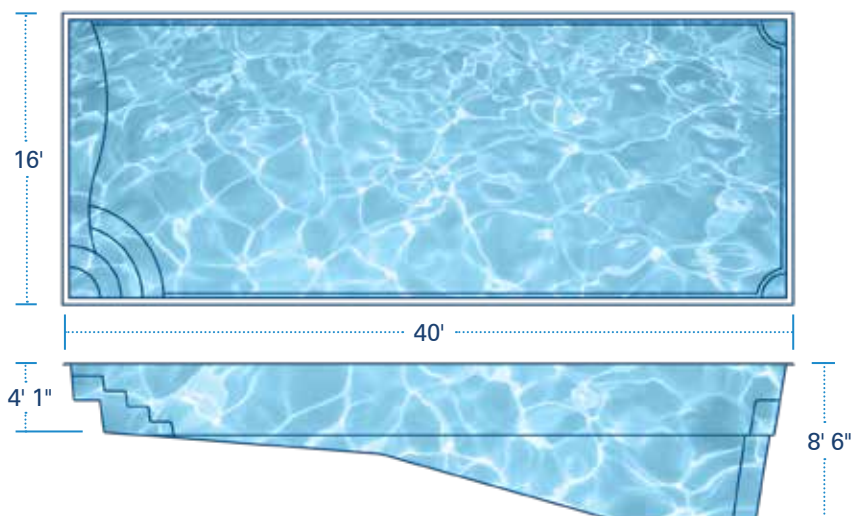

River Pools®
CATCH THE WAVE

T40 MODEL

If you're looking for the perfect deep-end fiberglass pool, look no further! Swimmers and socializers can both enjoy the T40 at the same time.

T40

THE T40 FEATURES:

SPACIOUS SHALLOW-END BENCH SEAT

Want to take a break from the action and hang out with some friends? This seating area is properly sized to accommodate the whole family.

LARGE SHALLOW END FOR SOCIALIZING & PLAY

The problem with most deep-end pools is a small shallow end, which is where most people gather. The T40 shallow end is a spacious 15 feet to accommodate larger groups.

OPEN POOL INTERIOR

Want plenty of room to float and frolic? The rectangular design of the T40 provides ample room for all of your pool activities.

DEEP-END SEATS & EXIT POINTS

When using deep-end pools, people love to be in the deep end, exit, and repeat. The deep-end seats of the T40 provide a place to get in and out, as well as take a rest.

MASSIVE 8'6" DEEP END

Looking for lots of water? You'll enjoy the large deep-end area. At 8'6", the T40 is deeper than standard deep-end pools.

AUTOMATIC-COVER FRIENDLY

The rectangular design of the T40 allows cover tracks to be hidden beneath the pool coping, protecting them and keeping them out of sight.

The final finished product may vary from the color samples on this page.

COMMITMENT TO BRINGING FAMILIES TOGETHER

From our humble origins to building high-quality fiberglass pools in a state-of-the-art facility, the River Pools mission has always been to bring families together. Whether your family is small, large, or somewhere in between, a modern fiberglass pool is the perfect backdrop for your gatherings.

COMMITMENT TO EMPLOYEE SAFETY

We hope you can sense the passion we have for building fiberglass pools that benefit you and your family. Our facility puts practices and standards in place to ensure your pool is being built with high-quality materials and is designed following tried and true quality management criteria. Along with prioritizing quality control, we also place focus on employee health and safety. Each production room contains laminar air flow, meaning air passes through the space evenly and allows for only fresh air to circulate through the room.

COMMITMENT TO THE ENVIRONMENT

Our passion also extends outside facility walls to protecting the environment as much as possible. We strive to minimize our environmental footprint and implement strategies to continuously improve. A regenerative thermal oxidizer device destroys up to 98% of volatile organic compounds (VOCs) produced during the pool building process and turns them into CO₂ and H₂O. This keeps the air clean and aids in protecting both the local community and the greater world around us. River Pools is a proud member of the Indiana Partners for Pollution Prevention and the Indiana Department of Environmental Management's Environmental Stewardship Program and is recognized for going above and beyond existing environmental regulations. In reducing our environmental footprint, we hope you will feel encouraged that you are choosing the right pool manufacturer.

GREAT CARE BEGINS WITH WATER CHEMISTRY

The most important step in protecting your fiberglass pool's surface is keeping water chemistry within the recommended ranges. Staying in range helps prevent chalking, staining, and discoloration while supporting safe, comfortable water.

Maintain: pH 7.2–7.4, alkalinity 80–120 ppm, free chlorine 1–3 ppm, calcium hardness below 120 ppm, CYA 30–50 ppm, TDS under 1500 ppm (or up to 1000 ppm above salt level), and metals at zero. Fiberglass pools should never be treated with calcium-based products or Cal-Hypo, as added calcium increases the risk of surface damage.

Damage risk rises significantly when pH, calcium, and chlorine all exceed their ranges. To further protect your pool's finish, a stain and scale control product (chelating agent) is recommended to help reduce the effects of excess calcium and metals.

Ultimately, it's the pool owner's responsibility to ensure the water stays within these fiberglass-specific guidelines. Whether you handle maintenance yourself or hire someone else, you must make sure the right care is being followed.

KEEP IT SAFE WITH AN AUTOMATIC POOL COVER

Automatic pool covers help protect your pool investment, and even more importantly, they help protect those who matter most. Safety will always be your top concern with your new pool, and an automatic pool cover will give you added security and peace of mind.

An automatic pool cover will provide you with a more enjoyable pool ownership experience by reducing the amount of time, money, and energy you'll need to spend on pool maintenance. They keep debris out and chemicals in.

It's important to note that automatic pool covers should never be the sole barrier to pool entry. River Pools, along with The Pool and Hot Tub Alliance, believe every pool should have multiple layers of protection, such as fencing with locking gates, alarms, etc.

WHAT TO EXPECT FROM RIVER POOLS

Once you decide on the pool of your dreams, a process is in place to keep things moving smoothly. Here is an overview of that process, as well as some important things you should know:

You will be asked to sign an acknowledgment and register your warranty before signing your contract with your installer. However, your warranty does not take effect until installation.

Pool shell orders require a 50% deposit from the installer to River Pools to go into production. This means the production lead time we have established will not begin until the deposit is received.

Ask your installer for a lead time at the time of your pool shell order. Only your Installer can answer questions concerning payment, production, or delivery of your pool shell.

Prior to shipping being scheduled, your Installer must pay any remaining balance. Again, all requests and questions concerning pool shell orders and delivery must be directed to the installer.

Do your due diligence. Installers go through an application process; however, that should not replace your own vetting of the installer. River Pools is not responsible for the obligations of the installer. Ask for references. Ensure the installer can answer all your questions thoroughly, professionally, and patiently. Be wary of down payments that are significantly above the market average. An ideal draw schedule should match the amount of work done.

Read through your contract with your installer. Make sure you understand everything outlined within it and ask any questions you have prior to signing. Consider getting a second opinion if you are not certain. River Pools is not privy to your contract details, so any questions should be directed to your Installer.

*Installers, including dealers and franchisees, are not employed by or agents of River Pools. They own and operate their own companies. River Pools is simply a vendor to said company.

Your new inground fiberglass pool is a once-in-a-lifetime investment that should be protected by a comprehensive warranty. At River Pools, we operate on three guiding principles: honesty, integrity, and mutual respect. Those principles guide our warranty, too. When you buy a River Pools fiberglass pool, you'll find that our warranty is comprehensive and easy to understand.

Our Standard One-time Transferable Limited Warranty Includes:

Fiberglass Pool Limited 35-Year Structural Warranty: River Pools warrants your pool will not leak due to structural failures caused by workmanship and material used in manufacturing of the pool.

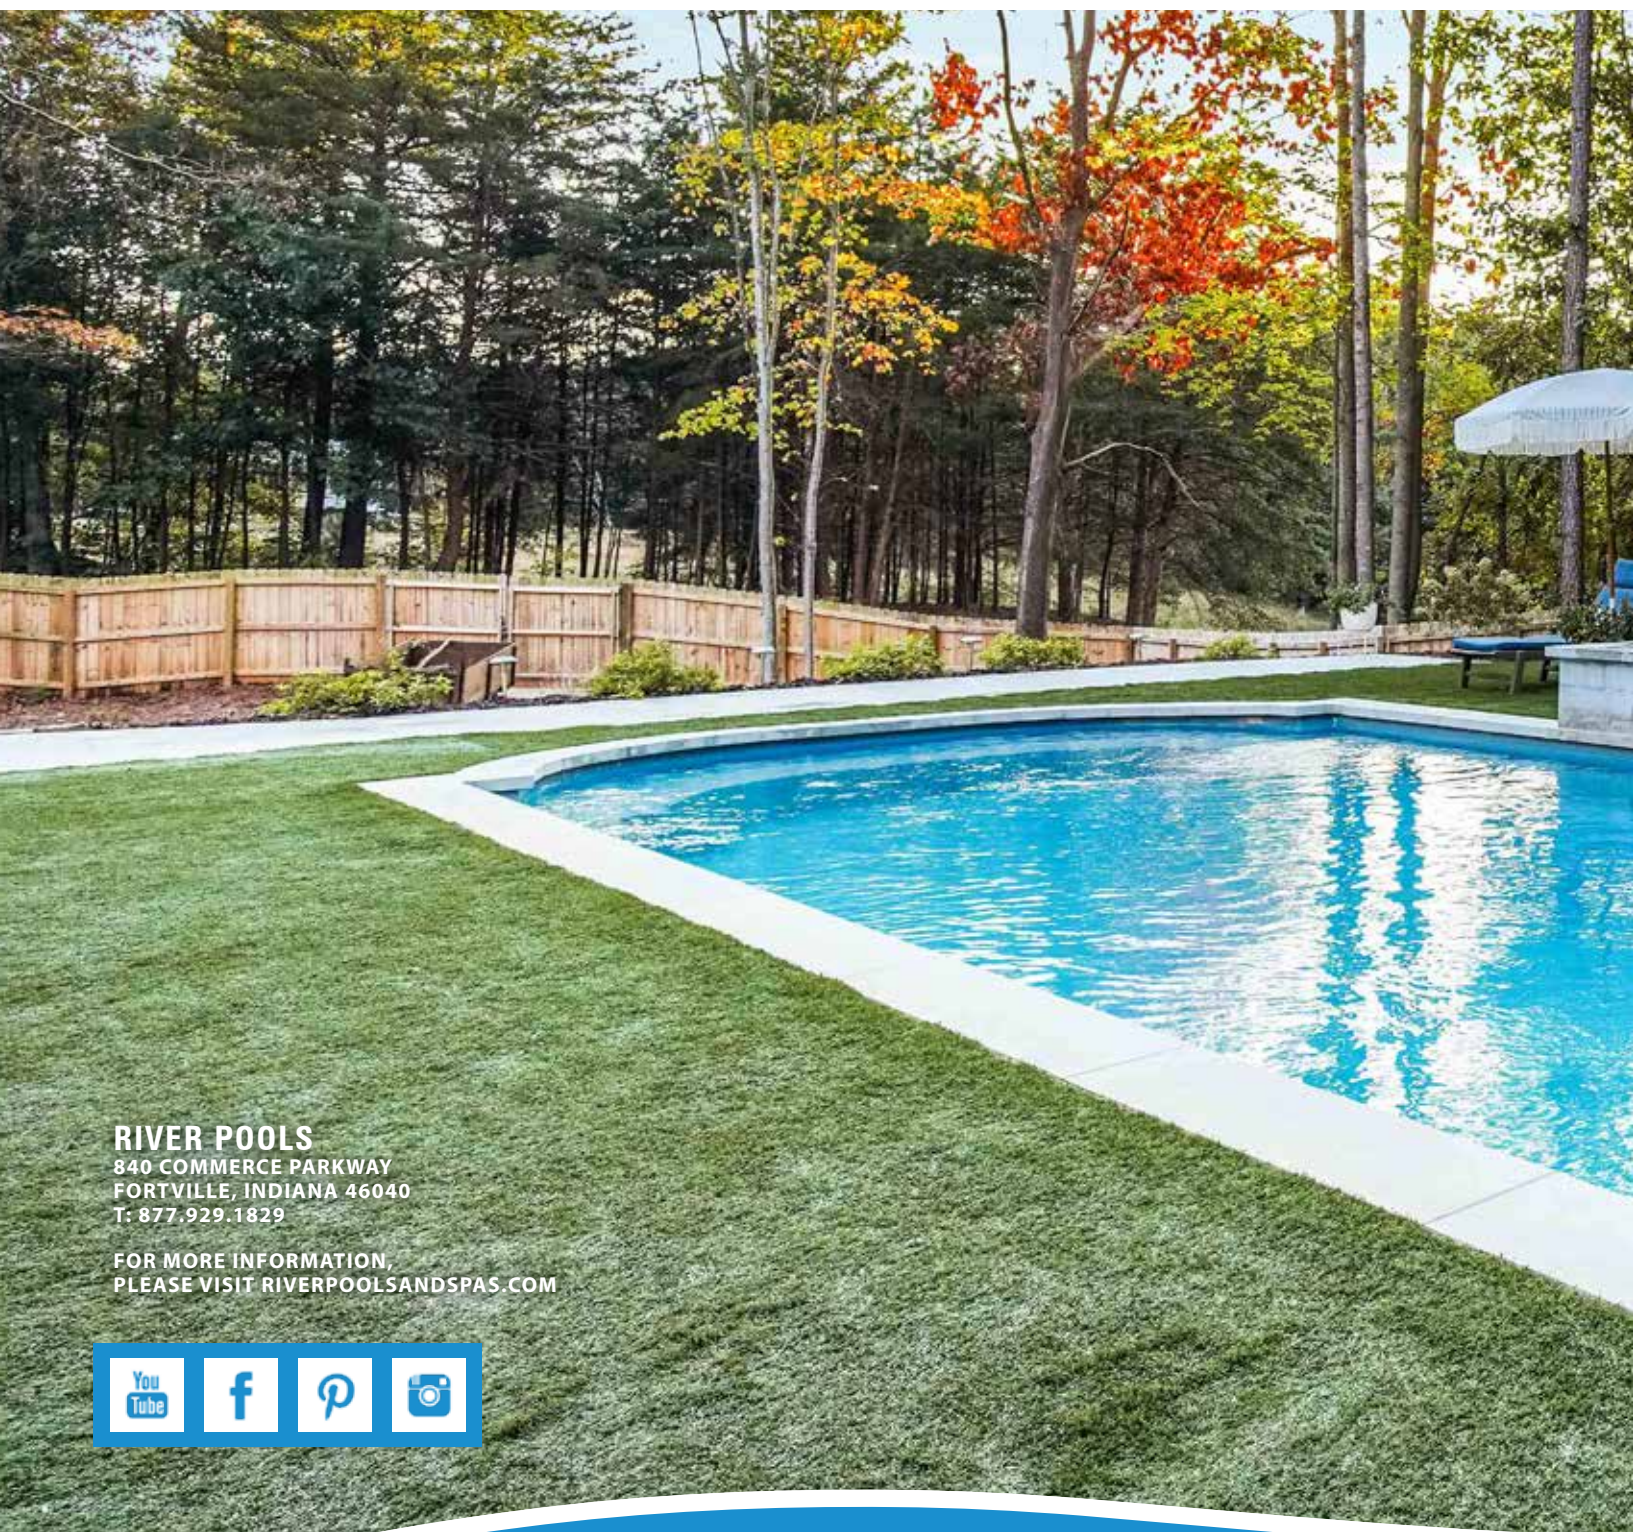

Limited 15-Year Pool Surface Warranty: River Pools offers a 15-year surface warranty against osmotic blistering.
