

Safety Covers

Make Mine a Merlin

With Merlin you can count on Strength, Quality & a Perfect Fit!

Why Merlin is your best choice:

- High quality craftsmanship made in Hamilton, NJ leads to excellent custom fitting covers!
- The only place to get patented SmartMesh with 100% shade!
- Our patented spring is made with non-corrosive stainless steel and has a coined edge and unique spring cover design to make it the best spring in the industry! Having a superior spring on a pool safety cover is crucial because it ensures the cover maintains proper tension, which is key to safety, durability, and performance. This not only extends the life of the cover but also provides greater protection for children, pets, and your pool investment.
- High quality hardware including stainless steel options.
- Get the color you want! No upcharge on colors!
- Ratchet strap system available when you don't want to drill into your spa!
- Easy installation and removal each season!
- Special features include specially designed step-riser kits and/or cable systems to close up gaps and ensure security for pools with unique construction features.
- Perimeter cross-straps are reinforced by sewing an "x" pattern stitch to lock the straps together with UV resistant yarn.

When properly installed, using all hardware provided for such installation, Merlin Professional Safety Covers meet or exceed the standards set forth by A.S.T.M. F1346-91.

Special Features and Hardware

Secure your swimming pool with a professional safety cover to protect your investment and your loved ones.

Our **Stainless Steel Ratchet Option** for closing and attaching pool covers and/or spa covers without needing to drill for cable assembly. Specify the "Ratchet Style" closure option on your quote request to get this hardware!

*Please note there are some limitations to this style, check with your dealer to see if this is the right fit for you.

The **Cable System** on a safety cover is ideal for pools with raised walls or other features where traditional straps and anchors can't be used. The cable is securely attached to the raised structure, allowing the cover to clip directly onto it.

Perimeter Padding is used to protect your pool cover when there is brick coping, bullnose coping, pavers, rock ending, rough coping, stitched or stone coping. Merlin offers velcro perimeter padding so that it is easily replaced when needed.

Gap Fillers are used to seal the space between the cover and the raised feature, helping prevent debris from entering the pool.

Merlin offers the best high-quality hardware in the industry!

The best spring in the business!

Snap in deck anchor to avoid drilling into your deck.

Aluminum Stake

Coil Anchor is perfect for grass!

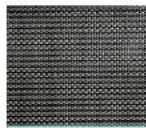

Anchors available in brass and a stainless steel upgrade!

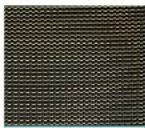

SmartMesh™: The Ultimate Mesh Cover!
